Shanice has created a function machine.

$$h \longrightarrow \boxed{-9} \longrightarrow \boxed{\times 2}$$
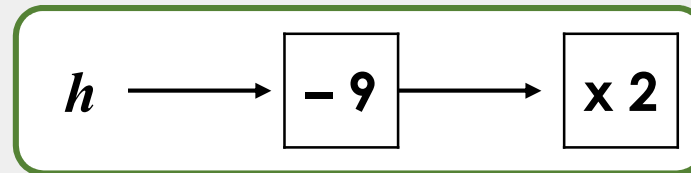

She says,

The expression formed from this function machine is $9h - 2$.

Explain Shanice's mistake.

**Bear has put some terms into a function machine.
What is the output if the input is 25?**

Inputs:

30
45
15

Function:

Outputs:

6
9
3
