Complete the four number sentences
using the number cards

$$\boxed{56} = \boxed{7} \times \boxed{8}$$

$$\boxed{56} = \boxed{8} \times \boxed{7}$$

$$\boxed{56} \div \boxed{7} = \boxed{8}$$

$$\boxed{56} \div \boxed{8} = \boxed{7}$$

$$\boxed{7 \times 10 = 70} + \boxed{7 \times 4 = 28}$$

\swarrow

$\boxed{7 \times 14}$ \rightarrow $\boxed{7 \times 7 = 49} \times 2$

$$\boxed{7 \times 10 = 70} + \boxed{7 \times 5 = 35} + \boxed{7 \times 1 = 7}$$

\nwarrow

$\boxed{7 \times 18}$ \rightarrow $\boxed{7 \times 6 = 42} \times 3$

\swarrow

Double $\boxed{7 \times 10 = 70}$ then subtract $\boxed{7 \times 2 = 14}$

When a group of children are put into teams of 6 there are equal groups.

When the same group of children are put into teams of 7, there is one child not in a team.

There are less than 100 children.

How many children could there be?

Have a think

When the same number of children are put into teams of 6 there are 2 equal groups. One child not in a team.

Cannot be an odd number as all multiples of 6 are even

I think the next time this would happen is 120 children. Do you agree?
